Subject: Amended Order of Conditions Request
Keith Middle School
Wetland Remediation
MassDEP File # SE 049-0802

TRC Environmental Corporation (TRC) prepared this letter regarding the proposed excavation and capping of contaminated sediments at Keith Middle School (KMS) to request an Amended Order of Conditions for the above-identified work.

The attached drawings have been revised in response to comments received by Kimberly Tisa of the United States Environmental Protection Agency. Ms. Tisa requested two additional sample locations be included in the capped area (SD-3L and SD-3V). These samples are located between the former Areas 1 and 2. As a result, the two areas have been combined into a single, larger capped area and renumbered as Area 1. I have attached the following drawings that have been impacted by the changes.

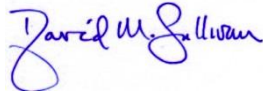

- Figure 5 – Sampling Locations and Remediation Overview
- Figure 6 – Pre and Post Remediation Sampling Plan
- Drawing 1 – Construction Sequence and Site Preparation Map.
- Drawing 5 – Final Conditions Map

Due to the revision of the work area, the wetland areas impacted by the work has changed as well. The revised areas are provided in the table below.

	Area 1 (square feet)	Area 2 (square feet)	Totals (square feet)
Capping/Excavation	1949.73	1269.3	3219.03
Requiring Clearing	134.59	736.24	870.83

Please contact TRC if you have any further questions or comments, and we will be pleased to address them.

Sincerely,

David M. Sullivan, LSP
Project Manager
