Release Abatement Measure Status Report

Greenwood and Ruggles Street Buildings Demolition Activity
101, 102 and 111 Greenwood Street and 98, 108, and 118 Ruggles Street
New Bedford, Massachusetts

Release Tracking Number (RTN) 4-15685

TRC Project Number: 115058

TRC Environmental Corporation (TRC) is submitting this Release Abatement Measure Status Report (RAM Status Report) to the Massachusetts Department of Environmental Protection (MassDEP) on behalf of the City of New Bedford (City) in accordance with 310 CMR 40.0440 of the Massachusetts Contingency Plan (MCP). This RAM Status Report addresses the construction activities (building demolition) undertaken at City-owned residential properties on Greenwood and Ruggles Streets. The construction activities initiated under the RAM Plan submitted to MassDEP on September 9, 2009 included the installation of fence posts, initial mobilization of heavy equipment, clearing of above-ground shrub growth, and initial deployment of storm water runoff mitigation materials (hay bales and silt fence). Activities ceased when further regulatory review by the United States Environmental Protection Agency (EPA) was requested by EPA. Following additional correspondence pertaining to the regulatory review, TRC prepared a Modified RAM plan, which was submitted to MassDEP on September 17, 2009. The residential properties addressed in this RAM Status Report are part of the Parker Street Waste Site (PSWS) that is tracked by the MassDEP under Release Tracking Number (RTN) 4-15685. A site location map is provided as Figure 1.

This RAM Status Report is organized as follows: Section I (Background) briefly summarizes information on TRC's involvement with the Site, the circumstances of the release and the objectives of this RAM Status Report. Section II (RAM Status Report) provides the information required for a RAM Status Report under the MCP, as set forth under 310 CMR 40.0445. Section III (References) lists information sources relied upon in the preparation of this RAM Status Report. Attachment A contains dust monitoring field logs and data.

I. BACKGROUND

The RAM for this project addresses construction activities (demolition of dwellings at six properties) that will be undertaken by the City at the 101, 102, and 111 Greenwood Street, and 98, 108, and 118 Ruggles Street (hereinafter "Acquired Residential Properties") portion of the Site located on the eastern end of Greenwood and Ruggles Streets near or at the intersection of Hathaway Boulevard in New Bedford, Massachusetts.

The RAM plan originally filed on September 9, 2009 addressed the installation of a perimeter fence, excavation and immediate replacement of soils to allow for the disconnection of underground dwelling utilities, demolition of the dwelling structures and disposal of the dwelling debris, demolition of the concrete foundations to two feet below ground surface and off-site

disposal of the concrete, breaking the basement slabs to enable drainage, and backfilling of the basement space with suitable off-site material and establishment of grass cover. The September 9, 2009 RAM Plan described measures to be taken to minimize soil disturbance to the extent practicable and mitigate potential fugitive dust generation. The City did not plan to remove any soil from the Acquired Residential Properties as part of the work.

In response to concerns raised by private parties involved with the Site and some local residents, EPA requested clarification on certain activities proposed in the September 9, 2009 RAM Plan.

Specifically EPA sought clarification on the following:

- Management of concrete foundation materials subject to demolition that may be in contact with potential polychlorinated biphenyl (PCB) impacted soil that may constitute PCB Remediation Waste; and
- Sampling to evaluate the potential impact of the presence of potential PCB impacted soil that may constitute PCB Remediation Waste on the regulatory status and management procedures for the foundation materials.

The City provided EPA's requested clarification in a letter to EPA (Kim Tisa) dated September 16, 2009.

The Modified RAM Plan was submitted to MassDEP on September 17, 2009. The Modified RAM Plan outlined the following activities:

- On-site crushing of concrete foundations materials and reuse of material as fill within basement space, instead of off-site disposal of same, consistent with MassDEP policy and related regulatory interpretations;
- Acknowledgement of the potential presence of soil potentially classified as PCB Remediation Waste under EPA regulation (specifically, 40 CFR Part 761.3) on three of the parcels slated for demolition (specifically, 118 Ruggles Street, 101 Greenwood Street, and 102 Greenwood Street);
- Sampling and analysis to evaluate if the portions of the concrete foundation in contact with soil and subject to demolition and subsequent management have been impacted by contact with any potential PCB impacted soil at 118 Ruggles Street, 101 Greenwood Street, and 102 Greenwood Street that may constitute a PCB Remediation Waste leading to regulation of foundation materials at those parcels as a PCB Remediation Waste;
- Clarification regarding dust monitoring;
- Clarification regarding decontamination of certain pieces of equipment or items that may come into direct contact with soil or concrete determined to be actual or potential PCB Remediation Waste; and
- Inclusion of an updated project narrative prepared by the City.

Many of the activities outlined in the original September 9, 2009 RAM Plan remained unchanged, such as the installation of a perimeter fence (already initiated as part of site

preparation activities), excavation and immediate replacement of soils to allow for the disconnection of underground dwelling utilities, demolition of the dwelling structures and disposal of the dwelling debris (aside from the foundation materials). The principal changes to the demolition approach addressed in the Modified RAM Plan involved the following items in the original (September 9, 2009) RAM Plan: Demolition of the concrete foundations to a location at or below grade, breaking the basement slabs to enable drainage, and backfilling of the basement space with crushed concrete foundation materials and suitable off-site material and establishment of grass cover.

Neither the original (September 9, 2009) RAM Plan nor the September 17, 2009 Modified RAM Plan involve the removal of soil from the Acquired Residential Properties. Nevertheless, the City views the proposed building demolition activities as an interim step toward the implementation of a full remedy for the subject parcels, currently in the planning stage, which will be the subject of subsequent regulatory submittals to the EPA and MassDEP. Should soil removal be required, it will be subject to any and all required regulation approvals for such actions.

Prior to initiating RAM-related activities, the City performed abatement work outside the scope of MCP RAM Plan requirements to remove hazardous materials identified within the structures including asbestos containing materials, miscellaneous containers of fluids, mercury thermostats, and other household items or items associated with the materials of construction.

The applicable MassDEP RTN is 4-15685, which is assigned to the PSWS. This RAM Plan has been prepared to guide soil management activities associated with the aforementioned construction/demolition activities.

The work set forth in the Modified RAM includes:

- Installation of a perimeter fence and associated access gates (as part of site preparation activity), which will remain in place through the completion of activities described in the modified RAM Plan and until such time that a complete remedy is implemented;
- Excavation and immediate replacement of soil during the disconnection of site underground utilities;
- Demolition of dwelling structures and off-site disposal of dwelling debris (aside from the concrete foundation materials);
- Demolition and subsequent management of the concrete foundations to a location at or below grade;
- Breaking up the basement slab to facilitate post-demolition drainage;
- Backfilling of basement space/covering of basement slab with crushed concrete foundation materials and with appropriately documented contaminant-free fill material screened in advance for the presence of regulated contaminants;
- Removal of an above-ground swimming pool at one residence and other potential miscellaneous aboveground structures (e.g., sheds);
- As needed sampling and analysis of surficial soil materials;

- Sampling and analysis to evaluate the regulatory status of concrete foundation material in contact with soil as discussed further herein; and
- Minimal temporary soil stockpiling and stockpile management during activities that require excavation of soil (such as utility disconnection activities).

II. RELEASE ABATEMENT MEASURE STATUS REPORT (310 CMR 40.0445)

This RAM Status Report is organized according to the minimum information needs set forth under 310 CMR 40.0445(2)(a) through (e) of the MCP.

(a) The Status of Response Operations

The following RAM related activities took place during the reporting period:

- Installation of chain-link fencing via driven-post techniques.
- Above-ground clearing of shrubbery at the following residences: 101, 102, and 111 Greenwood Street.
- Initial deployment of storm water runoff mitigation material (hay bales and silt fence).
- Initial mobilization of heavy equipment (e.g., excavator, steel plates) and subsequent demobilization.

These activities took place from September 8, 2009 to September 11, 2009. TRC provide field oversight including dust monitoring and volatile organic compound (VOC) field screening during fence installation, clearing of shrubbery, deployment of hay bales and silt fence, and the initial mobilization/demobilization of heavy equipment.

Field activities ceased at the request of the City to respond to EPA regulatory inquiries. Activities will resume in the Spring following supplemental data collection associated with the building foundations. In addition, the City will also install gates on the fence to facilitate access for upcoming RAM-related activities.

(b) Significant New Site Information or Data

One result of the EPA regulatory review is the collection of additional samples for laboratory analysis. Media targeted for sampling include soil and concrete foundation material. TRC is preparing a sampling approach for EPA review. The sampling approach is expected to be finalized during the next RAM reporting period.

(c) Details of and/or Plans for the Management of Remediation Waste, Remedial Wastewater, and/or Remedial Additives

No Remediation Waste has been generated.

(d) Other Necessary Information

Dust monitoring was performed during the above activities between September 8 and September 11, 2009 in accordance with the procedures outlined in Section 6 of the Modified RAM Plan. Dust levels did not exceed the prescribed action limit of 150 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$) during any of the construction activities sustained over 15 minutes. Data was downloaded daily and log sheets are included in Appendix A. Due to a possible malfunction, dust monitoring data was not automatically recorded on September 8, 2009 until approximately 1.5 hours after dust

monitoring commenced. Field data was recorded by the TRC geologist on-site in response to the malfunction. In addition, an equipment malfunction on September 9, 2009 required replacement of the upwind monitor on September 10, 2009. Dust monitoring was only conducted adjacent to the nearest residential property and downwind of the site in the absence of the upwind monitor.

(e) LSP Opinion

The objective of this RAM status report is to apprise MassDEP of City activities associated with construction activities (building demolition) at locations with potentially impacted soil at the acquired properties portion of the PSWS.

This RAM Status Report has been prepared in accordance with 310 CMR 40.0445 as set forth in the MCP.

 "Downwind" and "Near Property" units were run with a 10 second time constant for the entire duration of 9/8/09 monitoring. As a result, the above noted average, maximum and minimum readings do not match with the actual data download from these units as the field sheet readings (above) are based on 10-second averages/readings and the download is based on 60-second averages/readings (J. Saunders 9/9/09).

Model: Dust Trak

Model Number: 8520

Serial Number: 85202232

Test ID: 3

Test Abbreviation: UW

Start Date: 9/9/2009

Start Time: 12:40:15

Duration (dd:hh:mm:ss): 0:00:43:00

Time constant (seconds): 60

Log Interval (mm:ss): 1:00

Number of points: 43

Notes: After moving to new location along Hathaway Blvd. Battery died at end of test. Stopped using unit after this.

Statistics

Channel: Aerosols

Units: mg/m³

Average: -0.012

Minimum: -0.027

Time of Minimum: 13:02:15

Date of Minimum: 9/9/2009

Maximum: 0.199

Time of Maximum: 13:14:15

Date of Maximum: 9/9/2009

TrakPro Version 4.10 ASCII Data File

Model: Dust Trak
Model Number: 8520
Serial Number: 85200990
Test ID: 1
Test Abbreviation: DW
Start Date: 9/10/2009
Start Time: 8:09:12
Duration (dd:hh:mm:ss): 0:04:23:00
Time constant (seconds): 60
Log Interval (mm:ss): 1:00
Number of points: 263
Notes:

Statistics

Channel: Aerosol
Units: mg/m³
Average: 0.007
Minimum: 0.005
Time of Minimum: 9:45:12
Date of Minimum: 9/10/2009
Maximum: 0.012
Time of Maximum: 9:28:12
Date of Maximum: 9/10/2009

Calibration

Sensor: Aerosol
Cal. Date: 5/28/2009

Model: Dust Trak

Model Number: 8520

Serial Number: 85200990

Test ID: 2

Test Abbreviation: DW

Start Date: 9/10/2009

Start Time: 12:35:45

Duration (dd:hh:mm:ss): 0:02:21:00

Time constant (seconds): 60

Log Interval (mm:ss): 1:00

Number of points: 141

Notes: Test 2 started when downwind monitor was moved in front of 111 Greenwood.

Statistics

Channel: Aerosol

Units: mg/m³

Average: 0.007

Minimum: 0.004

Time of Minimum: 14:31:45

Date of Minimum: 9/10/2009

Maximum: 0.013

Time of Maximum: 14:02:45

Date of Maximum: 9/10/2009

Calibration

Sensor: Aerosol

Cal. Date: 5/28/2009

Date	Time	Aerosol
MM/dd/yyyy	hh:mm:ss	mg/m ³

September 10, 2009

TrakPro Version 4.10 ASCII Data File

Model: Dust Trak

Model Number: 8520

Serial Number: 85200314

Test ID: 1

Test Abbreviation: UW

Start Date: 9/10/2009

Start Time: 8:07:03

Duration (dd:hh:mm:ss): 0:04:24:00

Time constant (seconds): 60

Log Interval (mm:ss): 1:00

Number of points: 264

Notes:

Statistics

Channel: Aerosol

Units: mg/m³

Average: 0.012

Minimum: 0.009

Time of Minimum: 8:52:03

Date of Minimum: 9/10/2009

Maximum: 0.030

Time of Maximum: 11:53:03

Date of Maximum: 9/10/2009

Calibration

Sensor: Aerosol

Cal. Date: 9/4/2008

New Bedford, Massachusetts
September 10, 2009

TrakPro Version 4.10 ASCII Data File

Model: Dust Trak
Model Number: 8520
Serial Number: 15179
Test ID: 1
Test Abbreviation: NP
Start Date: 9/10/2009
Start Time: 10:48:45
Duration (dd:hh:mm:ss): 0:03:54:00
Time constant (seconds): 60
Log Interval (mm:ss): 1:00
Number of points: 234
Notes: Started late because it wasn't delivered by pine until 1035.

Statistics

Channel: Aerosol
Units: mg/m³
Average: 0.009
Minimum: 0.006
Time of Minimum: 11:05:45
Date of Minimum: 9/10/2009
Maximum: 0.026
Time of Maximum: 13:35:45
Date of Maximum: 9/10/2009

Calibration

Sensor: Aerosol

Dust Monitoring Data
City of New Bedford - Residential Demolition
New Bedford, Massachusetts
September 11, 2009

TrakPro Version 4.10 ASCII Data File

Model: Dust Trak
Model Number: 8520
Serial Number: 85200314
Test ID: 1
Test Abbreviation: UW
Start Date: 9/11/09
Start Time: 7:47:25
Duration (dd:hh:mm:ss): 0:05:17:00
Time constant (seconds): 60
Log Interval (mm:ss): 1:00
Number of points: 317
Notes: Positioned under tree across Hathaway Blvd on NBHS side.

Statistics

Channel: Aerosols
Units: mg/m³
Average: 0.015
Minimum: 0.011
Time of Minimum: 8:01:25
Date of Minimum: 9/11/2009
Maximum: 0.040
Time of Maximum: 11:33:25
Date of Maximum: 9/11/2009

Calibration

Sensor: Aerosols
Cal. Date: 9/4/2008

Model: Dust Trak

Model Number: 8520

Serial Number: 85200314

Test ID: 2

Test Abbreviation: UW

Start Date: 9/11/2009

Start Time: 13:07:49

Duration (dd:hh:mm:ss): 0:01:32:00

Time constant (seconds): 60

Log Interval (mm:ss): 1:00

Number of points: 92

Notes: Started after wind changed direction, positioned on the corner of Ruggles and Hathaway (see photo)

Statistics

Channel: Aerosols

Units: mg/m³

Average: 0.018

Minimum: 0.014

Model: Dust Trak

Model Number: 8520

Serial Number: 85200990

Test ID: 2

Test Abbreviation: DW

Start Date: 9/11/2009

Start Time: 13:13:48

Duration (dd:hh:mm:ss): 0:01:21:00

Time constant (seconds): 60

Log Interval (mm:ss): 1:00

Number of points: 81

Notes: Positioned in front of 102 Greenwood st, inside fence

Statistics

Channel: Aerosol

Units: mg/m³

Average: 0.015

Minimum: 0.012

Time of Minimum: 13:15:48

Date of Minimum: 9/11/2009

Dust Monitoring Data
City of New Bedford - Residential Demolition
New Bedford, Massachusetts
