Planning Board Special Permit Application Checklist

☒ 1. **Completed Application Form** (with all required signatures; Original plus 15 Copies)

☒ 2. **Plans**

- Four (4) stapled and folded sets of full-sized plans (24" x 36") and Twelve (12) sets of reduced plans (11" x 17") are required for all applications. Staff reserves the right to require additional copies.
- One (1) electronic copy (PDF & CAD) of all proposed activity plans (See Section 10 of Checklist for Requirements)
- All plans oriented so that north arrow points to top of sheet
- Plans shall be drawn at a minimum scale of 1" = 40' or less
- All plans shall be stamped by Commonwealth of Massachusetts-registered Professional Engineer, Professional Land Surveyor, and/or Professional Landscape Architect, as appropriate
- Plan sets shall be comprised of separate sheets as listed below unless otherwise approved by the City Planner
- All plans shall have a title block comprised of the following: Project Title, Sheet Title, Sheet Number; Registrant Stamp (i.e. PE, PLS, LA); Registrant's name and address; Street addresses of the project area parcels; Scale at which the plan is drawn; Plan Issue Date; and all plan revision dates (with corresponding revision descriptions).

☒ 3. **Certified Abutters List** (4 copies)

☒ 4. **Proof of Ownership** (Deed(s) for All Involved Parcels; 4 Copies)

☒ 5. **Photos Depicting Existing Conditions** (Minimum of 3, In Color, 1 Aerial + 2 Other Views; 16 Copies)

☒ 6. **Development Impact Statement (DIS)**, completed per §5350 of Zoning Code, (16 Copies), if required by Board

☒ 7. **Traffic Impact & Access Study (TIAS)** (16 Copies), if required by Board

☒ 8. **Electronic PDF and AutoCAD Files**

- Shall consist of a CD with a printed CD Label in a CD case
- CAD files shall be 2010 format or the latest revision of AutoCAD Civil 3D
- All project submissions shall include the following file types. All project related Drawing Files shall be provided in all 2 supported formats, listed below.
 - AutoCAD Drawing format (.dwg)
 - Adobe Portable Document Format (.pdf)

- PDF files shall be created from within the AutoCAD environment and contain Layer information.
- It is a requirement that each project drawing/sheet created for a project shall be published/plotted to DWG and PDF, and placed in the appropriate folder in the CD submission. All external references (DWG, DWF, DGN, PDF, TIFF, MrSID, JPG, etc.) which are used in support of the creation of these project sheets shall be stored within the XREF folder only (Subfolder of DWG) on the CD. Also the AutoCAD support files (fonts, plot style, etc.) should be supplied on the CD.

- **File Naming:**

The following file naming standard for all CAD related files created, used, or submitted to the Planning Department shall be followed. This applies to all CAD drawings, DWF's, PDF's used in support of, or used in conjunction with this CAD Standard.

File names shall begin with their project Planning Board Case number assigned (available through the Planning Department), followed by an underscore and the appropriate discipline code. In the instance where there is more than one file, assign an appropriate sequential number to the end (ex. 1,2,3). Special characters are not permitted except for the following; hyphens [-], underscores [_], and/or parenthesis [()].

Example 1.

A set of engineering design plans and documents were prepared for project file number 12-34; acceptable filenames would be as follows:

12-34_Existing Conditions1.dwg

12-34_Existing Conditions2.dwg

12-34_General1.dwg

12-34_General2.dwg

This cost is included in the Application Fee. The City of New Bedford Planning Division shall be responsible for placing the legal ad in the New Bedford Standard-Times.
- 2) The applicant shall be responsible for certifying the abutters list and mailing, by Certified Mail, with Return Receipt Requested, a copy of the notice to each affected abutter.
- 3) A Legal Advertisement will be drafted by Planning Staff, including the date, time and location of the public hearing, and provided to the Applicant upon submittal of a complete application. This Legal Advertisement may not be altered or amended by the Applicant prior to use in notifying Abutters.

PROJECT NARRATIVE

Site Description

The subject property encompasses approximately 1.59+/- acres of mostly developed commercial land located at the southwestern corner of the intersections of MacArthur Drive and South Street in New Bedford, Massachusetts. The property can be accessed by one of two access points. One of those being on the MacArthur Drive side of the property where the lot gets its frontage, and the other on the South Street side. Both points of access can be used to enter and exit, however the MacArthur Drive entry point is used mainly for customers and employees where the South Street access point is predominantly used for vehicles that will be loading and un-loading via the docks on that face of the building. The property is bounded on the west and south by other commercial businesses, and on the east and north by the previously mentioned MacArthur Drive and South Street. Having been mostly developed, the topography is relatively flat throughout the project site with minimal slopes to allow for the proper movement of stormwater. Several boreholes have been conducted within the limit of work and as expected the first two layers to an approximate depth of 6 ft down from the existing grade was classified as Urban Fill. Below that was a "glacial" layer of sand & gravel mix that went down to a depth of approximately 10 ft below grade until bedrock was encountered.

This site is currently not in use, but the most previous tenant was a fish processing and packaging plant. The future tenants will continue with the same use as before, and will seek to expand the operation as described below.

Project Description

The Applicants seek approval for the construction on the premises for a 21,575 S.F. addition to the existing commercial building. As previously stated the future business will deal with processing and packaging of fish and seafood product, and this proposed addition would be an area where items can be stored and refrigerated upon delivery. The proposed addition itself will be a steel warehouse type structure consistent with the existing building, and include one drive-in insulated overhead door and several typical steel doorways for foot traffic to enter and exit. The proposed building will have a slanted roof with roof gutters and down spouts that will empty to an underground rood recharge system located on site.

ENGINEERING A BETTER TOMORROW

ENGINEERING | SITE WORK | LAND SURVEYING

The anticipated traffic circulation throughout the property is not expected to change in volume as compared to the previous business which had similar hours and rates of deliveries. Additionally, by utilizing existing access points to the property, traffic outside of the site and on the adjacent right of ways will not be negatively affected by this proposed development.

Zoning Information

This property lies within the Waterfront Industrial district which allows for this type of proposed use, and abutting properties lie within a similar district entitled Industrial B. Although the abutting properties lie within a different district uses within both can be classified as commercial/industrial and thus have similar business hours and means of operation. The lot area and frontage will remain the same, however the setbacks to the front, side and rear have been proposed to alter from the existing conditions. As for the front setback that exists as 48.3+/- ft, we have proposed it to be 13.1+/- ft. The side setback that exists as 127.7+/- ft has been proposed as 11.3+/- ft. Lastly, the rear setback that previously existed as 10.4+/- ft will reduce slightly to 10.2+/- ft. All required setbacks are listed as 10 ft within this district, so all proposed dimensional setbacks would be in conformance with the ordinance. The lot coverage by building has been increased to 50.0% which is the allowed maximum within this district however the existing green space of only 6.9% has been increased to 10.2%. Finally, the height of the existing building was approximately 32 ft tall, and the addition is proposed as being 50 ft tall. This district allows for a building height of 100 ft, so the proposed building also is in compliance with this Zoning By-Law.

Construction Sequence

The preparation of the site for the proposed construction will follow the normal procedures for work of this type. The steps that follow are to be used as a guideline and may have to be adjusted due to site or weather conditions or unforeseen circumstances.

REQUEST FOR WAIVER

CASE #:

APPLICATION FOR WAIVER FROM SITE PLAN REVIEW REQUIREMENTS

In certain instances, after consulting with the City Planner, the applicant may submit, in writing, a request for waiver for any of the submittal or technical requirements of Section 5430 and 5440 where the project involves relatively simple development plans. The Planning Board will take a separate vote on written waiver requests by the applicant. Each request for waiver must be submitted individually to be considered by the Board. Please provide one (1) original and fifteen (15) copies of the request.

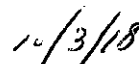

Any granted waivers must be disclosed on the final submitted and approved site plan.

DESCRIPTION	Ordinance Section		CLEARLY Describe why this request is being made.
	1	Code of Ordinances Ch 9 - Sec 5350 & 5455 Development Impact Study	The proposed work is minimal compared to the development already done on site, and similar businesses surround the property which operate at the same hours.
	2	Code of Ordinances Ch 9 - Sec 3130 Parking Requirements	Due to the low frequency of long term visitors, and the small staff, the existing parking provided although below the required amount should be sufficient, as it has been for similar businesses located on this site in the past.
	3	Code of Ordinances Ch 9 - Sec 5451.f Lighting Plan	As a redevelopment there is existing lighting located on site that will reduce the need for additional fixtures. These existing fixtures include ground mounted light poles and wall lighting on the building.
	4	SPR Checklist Section 8 Traffic Impact & Access Study	As an existing industrial use with two existing curb cuts, the site will be used as it was in the past with similar frequency. With no additional curb openings proposed or increases in traffic volume in and out of the site, a traffic impact & access study should not be necessary.

Additional pages describing the waiver request may be attached to this form following the same chart format, if necessary.

Site Plan Review Application Checklist

In order for the City of New Bedford Planning Board to accurately review your project in a timely manner, plan sets submitted with applications must be complete and thorough. A comprehensive understanding of this handout and submittal of all required documents and plans ensures an efficient review of your project.

Unless otherwise noted or determined by Planning Division Staff to not be required, the following information and drawings must be included in the submittal package for your application. For an application to be accepted, each and every item is required at the time of application submittal.

In certain instances, plans, or portions of plans, may be waived when not applicable for the review of a particular type of development, at the discretion of the City Planner. Requests for any such waiver(s) must be submitted, in writing, to Planning Division for consideration prior to application submittal.

All submitted materials must be legible, organized & bound (where appropriate) in a manner that allows for distribution of all proposal materials as 1 package. Please utilize double-sided printing for submitted reports, studies and statements when possible.

Initials Indicate
