4. REQUIRED FINDINGS FOR GRANTING A SPECIAL PERMIT

City of New Bedford Code of Ordinances Chapter 9 Section 5320 requires the ZBA to find the benefit to the City and the neighborhood outweighs the adverse effects of the proposed use, taking into account the characteristics of the site and of the proposal in relation to that site.

This determination includes consideration of each of the following:

	A : :	B	C
•	Social, economic, or community needs which are served by the proposal	Traffic flow and safety, including parking and loading	Adequacy of utilities and other public services
	D	E	F
	Neighborhood character and social structures	Impacts on the natural environment	Potential fiscal impact, including impact on City services, tax base, and employment

The full text of New Bedford Code of Ordinances can be accessed from: www.newbedford-ma.gov

Because the ZBA must be able to articulate their findings on each of the items listed above in order to grant a special permit, you must make your case as to HOW your application affects each of the criteria for consideration. This is an extremely important question and it is recommended that you answer this VERY carefully. You may use an additional sheet if needed.

housing and economic stimulus.
Describe how traffic flow and safety, including parking and loading, are addressed in your proposal:

	Describe the utilities and other public services necessary for your proposal, and explain how these are adequately available for your proposal:
	No new utilities are required, the existing utilities provide adequate service to the structure for the
	proposed use.
	Describe the neighborhood character and social structures surrounding your proposed location, and how your proposal will fit in this area:
	The area is a thickly populated residential neighborhood made up of single family, (2) two family, and
	multi-family Idwellings with a public park, Brooklawn Park (1) one block south and a middle school,
	Normandin (2) blocks north of this location; this proposal blends with the surrounding neighborhood.
	Describe any impacts on the natural environments your proposal may have:
	There is no proposed building footprint increase, by converting the repair shop to a residential unit all work
	will occur on the interior of the structure with the exception of relocating and installing (2) two new
	windows on the west wall to allow for proper egress and code compliance.
	Describe any potential fiscal impact, including impact on City services, tax base, and employment your proposal may have:
	The proposed alteration does not impact the city, the city will not need to provide any additional servies
•	that it does not already provide; the proposed alteration actually provides traffic relief to the neighborhood
	Please review the section(s) of the zoning ordinance under which your Special Permit request is made, there may be additional criteria required for your request. Describe how your proposal meets any additional criteria required under zoning ordinance:
	The proposed alteration does not substantially change nor does it create a more detrimental impact than
	the existing nonconforming structure to the neighborhood because all the work is occurring on the interior
	or a building with that blends in with the character of existing building in the neighborhood.

Development Impact Statement For 331-337 Wood Street New Bedford, MA

Property History:

The existing property consists of one (1) two story building with a residential unit on the second floor and a residential unit on the east side and a repair shop on the west side of the first floor that was erected around 1925. The building is located in the North end of New Bedford on the corner of Waldo and Wood Street; Lot 26, Map 117 with an area of 0.078 acres or 3,200 sf and is zoned as a RB use. The structure is of a raised residential unit over a storefront style building, having brick and stucco in the first floor and vinyl siding on the exterior with an asphalt single roof on the second floor and a tar built-up roof on the lower east side living unit. The structure is comprised of 2,340 sf. on the first floor 1,560 sf. on the second floor giving it a total of 3,900 gross sf.

Proposed Project:

The proposed project is to convert the repair shop on the west side of the first floor in to a (2) two-bedroom residential unit and a laundry facility for the building tenants at the rear of the existing building. There will be no building footprint increase in order to accomplish such alteration.

Site:

The existing site provides for (4) four off street parking spots as two (2) rows of two (2) stacked parking spaces on an area that is 20'-0" wide x 40'-0" deep.

Development Impact:

The conversion of the repair shop creates a relief to a thickly populated residential area by eliminating additional traffic flow for pickup deliveries and customer and employee parking. This conversion does not create any additional request for city services, if anything it actually reduces the hazard rating of the structure.

Scheduled Improvements

Other proposed improvements are to the exterior of the building which is to relocate and replace (2) two windows on the west side (Waldo Street) down to street level to provide the required means of egress for the bedrooms as required by the Commonwealth of Massachusetts State Building Code.

City of New Bedford REQUEST for a CERTIFIED ABUTTERS LIST

This information is needed so that an official abutters list as required by MA General Law may be created and used in notifying abutters. You, as applicant, are responsible for picking up and paying for the certified abutters list from the assessor's office (city hall, room #109).
