

STAFF REPORT

FROM: Connie Brawders, Staff Planner 

TO: Jennifer Clarke, AICP, Deputy Director, Department of Planning, Housing & Community Development

MEETING DATE: September 9, 2015

MASTER PLAN GOAL: Establish a sound foundation for future growth that builds upon its coastal location, preserves its historic legacy, and expands cultural and workforce opportunities.

MASTER PLAN ELEMENT: Jobs and Business

SUBJECT: Case #19-15 – 1080 Kings Hwy – McDonald's USA, LLC

Request to consider the following:

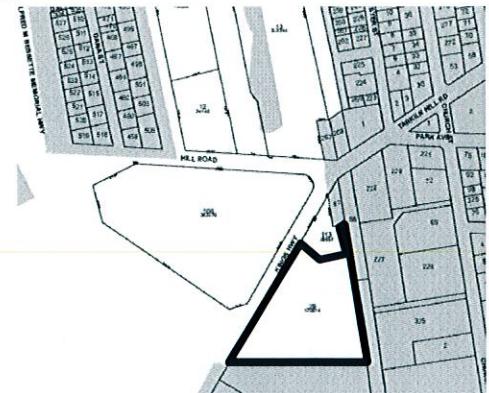

Request to consider **Site Plan Review** for new construction of a 4600+/- SF fast-food restaurant and **Special Permit** for reduction of parking spaces, located at in the Planned Business and Industrial - A zoning districts.

Applicant: McDonald's USA, LLC, Northeast Region, 690 Canton Street, Westwood, MA 02090

Applicant's Agent: Eric Dubrule, Bohler Engineering, 352 Turnpike Road, Southborough, MA 01772.

Owner: Cedar-Kings, 44 South Bayles Avenue, Port Washington, NY 11050

Location: 1080 Kings Highway (Map 125, Lot 29), (Attachment 2)

Key Items for Consideration:

- Conformance to Site Plan & Zoning Criteria
- Traffic Impact & Interior Circulation
- Impact on Abutters
- Comments Received
- Potential Business Redevelopment Under Master Plan 2020 Proposed Kings Highway Transit Oriented Development (TOD)

Case Overview:

The applicant proposes to demolish the existing 5145 +/- SF fast-food restaurant and construct a new 4600 +/- fast-food restaurant. The redevelopment project is located on a 0.95 acre site at King's Plaza Shopping Center on land leased by McDonald's USA, LLC.

In 1955, Ray Kroc founded McDonald's System, the predecessor model of McDonald's Corporation. By 1958, McDonald's had served its 100 millionth hamburger. Today, the fast food restaurant serves 69 million customers per day, in 100 countries with 80% of the business being a franchise operation. (http://www.mcdonalds.com/us/en/our_story/our_history/the_ray_kroc_story.html)

The new fast-food establishment will provide 72 dine-in seats. The current business seats 124 guests. Under **Section 3130** of the New Bedford zoning code, the new construction will require 56 parking spaces. The applicant seeks a Special Permit for parking and loading under **Section 3120** for a reduction of parking spaces from 56 to 41 spaces, two of which are ADA compliant.

The applicant is also requesting a Special Permit from the Zoning Board of Appeals, as stipulated under **Appendix A-Table of Principal Use Regulations, Line 23. Restaurant, Fast-Food**, as a fast-food restaurant with drive-thru is not a by-right use in the Planned Business or Industrial –A zoning districts. According to McDonald's website, the first McDonald's drive-thru was created in 1975 near an Arizona military base to serve soldiers who weren't permitted to get out of their cars while wearing fatigues.

The applicant also asks for relief from 25' Side Yard and 25' Rear Yard Setbacks from the ZBA for the encroachment of the trash enclosure under **Appendix B-Table of Dimensions**.

Traffic circulation proximal to McDonald's is being improved with the addition of curbing and designated entrance and exit driveways. The new fast-food drive thru will offer side-by-side drive-thru ordering stations.

Additional improvements include stormwater treatment, a drainage system which provides for water quality treatment, and 4625 +/- decreased impervious surface area. New utility connections, landscaping design, and building signage are under review consideration by the Planning Board. The existing free standing sign will remain at the site.

The case deliverables were received by the office of the New Bedford City Clerk on August 14, 2014.

The applicant has paid the fee for Site Plan Review, Special Permit, and legal notification in the amount of \$600.00.

Legal Notice has been prepared and publication dates in a newspaper of general circulation were August 26, 2015 and September 2, 2015.

Notice to the Abutter's were sent via USPS Certified Mail by Applicant's Agent and verified.

The Owner is Cedar-Kings, LLC of 44 South Bayles Avenue, Port Washington, NY 11050 as recorded at Deed Book 8820, Page 194 in the Bristol County (S.D) Registry of Deeds. A letter of authorization has been provided by Nancy Dittmeier on behalf of McDonald's.

There is no project time line for completion submitted for consideration by the Planning Board, no cost figure is provided by the applicant, and no term of lease specified within the case deliverables (See **5452. The site plan shall be accompanied by a written statement indicating the estimated time required to complete the proposed project and any and all phases thereof. There shall be submitted a written estimate, showing in detail the costs of all site improvements planned.**)

Zoning:

This type of activity requires site plan review under City of New Bedford Site Plan Review at **5420**.

Applicability. Section 5421. whereby, any new industrial or commercial construction or expansion over two thousand (2,000) gross square feet, or any new industrial or commercial construction or expansion requiring more than five (5) additional parking spaces is to be reviewed by the Planning Board.

The site is located in the Planned Business and Industrial-A zoning districts. As described under Case Overview, fast food restaurants are not permitted by-right in these zoning districts.

Review of the Zoning Matrix finds the following:

Existing Lot Area dimension is 303,360 SF. No changes are proposed for the Lot Area. Lot Width/Frontage of 665+/- SF remains unchanged. Minimum area and frontage requirements are 0 for PB and Industrial-A; the regulations have been met. Current building height is 16+/- Ft; proposed height of the new construction is 20' 3", falling within the 100 FT maximum allowed height. Existing Front Setback is 206+/- FT; proposed Front Setback is 174.6+/- FT, meeting the 25 FT Front Setback stipulations. Current Side Setback is 375+/- FT; proposed Side Setback is 410+/- FT, meeting the 25 FT setback. Second Side Setback equals 148+/- FT; proposed is 127.2+/- meeting the regulation of 25 FT. Current Rear Setback is 50.5+/- FT; proposed 68.7+/- Feet, meeting the required 25 FT setback. The proposed trash enclosure does encroach within the rear setback requirements and the applicant will seek relief from the City of New Bedford ZBA on a date yet to be determined.

Existing Permeable Space is 11.4% based upon the current 41,534 SF lease area. New construction Lot Coverage is 10.7%. City of New Bedford Zoning Code requires no greater than 50% of the lot be covered by a building in PB and I-A. The applicant is increasing Permeable Open Space and Green Space from 15.0% to 22.3%, exceeding the minimum stipulation of 20%.

A **Special Permit** for Parking Reduction from 56 to 41 spaces is being considered concurrently by the Planning Board with **Site Plan** review. Current zoning requires *One (1) space per employee per shift for a minimum of five (5) spaces plus one (1) space per 100 SF of gross floor area*. The applicant proposes for employees will be part of the McDonald's team of staff. *One Loading Space for each building* is a condition of approval under **Appendix C-Table of Parking and Loading Requirements**. It is anticipated McDonald's will serve 1,100 customers per day, in a twenty-four hour period. The business will operated

twenty-four hours a day, seven days per week. Deliveries occur between the hours of 7:00 a.m. -6:00 p.m. three times per week.

Development Information:

The purpose of site plan review is to provide for detailed review of development proposals which have an impact on the natural or built environment of the City in order to promote the health, safety and general welfare of the community; to ensure adequate parking, safe and accessible pedestrian and vehicular circulation; and to minimize traffic impact on City streets.

Context:

The subject property is located on the east side of Kings Highway. Route 140 exit 4 is approximately 0.08 miles from the site. Penn Central Rail line easement is located northeast of the site.

Surrounding Kings Plaza businesses include Savers, Work out World, Ocean State Job Lot, Madrags, Family Dollar, Bank of America kiosk, Fashion Nails, and Rent-a-Center.

Parking and Traffic:

Traffic circulation proximate to the new structure is being improved with the addition of curbing and designated entrance and exit driveways.

Technical Review of Site Plan:

The plan sheets were stamped by J.A. Kucich, PE. Landscape Plan was signed by M.J. MRVA, Registered Landscape Architect. Note F of the Landscape Specifications state "Plantings required for certificate of occupancy shall be provided during the next appropriate season at the municipality's discretion". No landscape schedule has been provided for the Planning Board's consideration. Elevation drawings and a floor plan have been provided for the Planning Board's review. It would appear the elevation and floor plans are boiler plate drawings.

Site Visit:

A site visit was conducted on August 26, 2015. Findings include the following:

The site locus is a low point in the parking lot. A Drainage Report dated August 12, 2015 has been provided for the Planning Board's consideration. The applicant states in the report that the project meets or exceeds the applicable stormwater management requirements, and therefore, it is anticipated that this project will have no adverse impacts on the surrounding environment.

Interdepartmental Review Comments:

Plans were sent for review to the following departments: City Solicitor, Health Department, Inspectional Services, Engineering Department, Public Infrastructure, Conservation Commission, Fire Department, and School Department.

The Planning Division has received these responses:

Ronald Labelle, Commissioner of Public Works, provided a Memorandum dated September 2, 2015.

The School department had no remarks to report for 19-15 McDonald's USA. The Health Dept had No Comment to report on Case #19-15 McDonald's USA.

Sarah Porter, Conservation Agent for the City of New Bedford responded:

Case #19-15 McDonald's USA – A Notice of Intent has been filed for this project. It falls within the 100' Buffer Zone to Bordering Vegetated Wetlands. The initial hearing date is September 8, 2015.

Staff Findings :

- Staff recommends the applicant provide a landscape plan noting the type and number of plantings that will enhance the site.
- Staff recommends stipulations and comments by Department of Public Infrastructure are included as conditions for plan approval.
- The Title Box reads, Providence County; plan revisions should read, Bristol County.

Proposed Use of Premises: McDonald's Restaurant (Fast-food w/ Drive-thru)

Zoning Relief Previously Granted (Variances, Special Permits, with Dates Granted):

n/a

4. Briefly Describe the Proposed Project:

The project proposes to demolish the existing ±5,145 SF fast-food restaurant to construct a new ±4,600 SF fast-food restaurant.

Traffic circulation proximate to the McDonald's is being improved with the addition of curbing and designated entrance & exit driveways.

Additional improvements include stormwater treatment, new utility connections, landscaping and building signage. The existing freestanding sign will remain. It's notable that the existing 50 parking spaces will be reduced to 40, which is sufficient for operations, however does not appear to be in compliance with minimum parking requirements and will require a Special Permit for Parking Reduction.

5. Please complete the following:

	Existing	Allowed/Required	Proposed
Lot Area (sq ft)	303,630 SF	0	no change
Lot Width (ft)	±665-ft	n/a	no change
Number of Dwelling Units	0	0	0
Total Gross Floor Area (sq ft)	±5,145 SF	n/a	±4,500 SF
Residential Gross Floor Area (sq ft)	n/a	n/a	n/a
Non-Residential Gross Floor Area (sq ft)	±5,145 SF	n/a	±4,500 SF
Building Height (ft)	±16-ft	100-ft	20'-3"
Front Setback (ft)	±206-ft	25-ft	±174.6-ft
Side Setback (ft)	± 375-ft	25-ft	±410-ft
Side Setback (ft)	±148-ft	25-ft	±127.2-ft

Rear Setback (ft)	± 50.5 -ft	25-ft	± 68.7 -ft
Lot Coverage by Buildings (% of Lot Area)	11.4%*	50%	10.7%*
Permeable Open Space (% of Lot Area)	15.0%	20%	22.3%
Green Space (% of Lot Area)	15.0%	20%	22.3%
Off-Street Parking Spaces	50	56	40
Long-Term Bicycle Parking Spaces	0	0	0
Short-Term Bicycle Parking Spaces	0	0	0
Loading Bays	1	1	1

* Calculation based on 41,534 SF lease area.

6. Please complete the following:

Planning Board Special Permit Application Checklist

1. **Completed Application Form** (with all required signatures; Original plus 15 Copies)

2. **Plans**

- Four (4) stapled and folded sets of full-sized plans (24" x 36") and Twelve (12) sets of reduced plans (11" x 17") are required for all applications. Staff reserves the right to require additional copies.
- One (1) electronic copy (PDF & CAD) of all proposed activity plans (See Section 10 of Checklist for Requirements)
- All plans oriented so that north arrow points to top of sheet
- Plans shall be drawn at a minimum scale of 1" = 40' or less
- All plans shall be stamped by Commonwealth of Massachusetts-registered Professional Engineer, Professional Land Surveyor, and/or Professional Landscape Architect, as appropriate
- Plan sets shall be comprised of separate sheets as listed below unless otherwise approved by the City Planner
- All plans shall have a title block comprised of the following: Project Title, Sheet Title, Sheet Number; Registrant Stamp (i.e. PE, PLS, LA); Registrant's name and address; Street addresses of the project area parcels; Scale at which the plan is drawn; Plan Issue Date; and all plan revision dates (with corresponding revision descriptions).

3. **Certified Abutters List** (4 copies)

4. **Proof of Ownership** (Deed(s) for All Involved Parcels; 4 Copies)

5. **Photos Depicting Existing Conditions** (Minimum of 3, In Color, 1 Aerial + 2 Other Views; 16 Copies)

6. **Development Impact Statement (DIS)**, completed per §5350 of Zoning Code, (16 Copies), if required by Board

7. **Traffic Impact & Access Study (TIAS)** (16 Copies), if required by Board

8. **Electronic PDF and AutoCAD Files**

- Shall consist of a CD with a printed CD Label in a CD case
- CAD files shall be 2010 format or the latest revision of AutoCAD Civil 3D
- All project submissions shall include the following file types. All project related Drawing Files shall be provided in all 2 supported formats, listed below.
 - AutoCAD Drawing format (.dwg)
 - Adobe Portable Document Format (.pdf)

- PDF files shall be created from within the AutoCAD environment and contain Layer information.
- It is a requirement that each project drawing/sheet created for a project shall be published/Plotted to DWG and PDF, and placed in the appropriate folder in the CD submission. All external references (DWG, DWF, DGN, PDF, TIFF, MrSID, JPG, etc.) which are used in support of the creation of these project sheets shall be stored within the XREF folder only (Subfolder of DWG) on the CD. Also the AutoCAD support files (fonts, plot style, etc.) should be supplied on the CD.

- **File Naming:**

The following file naming standard for all CAD related files created, used, or submitted to the Planning Department shall be followed. This applies to all CAD drawings, DWF's, PDF's used in support of, or used in conjunction with this CAD Standard.

File names shall begin with their project Planning Board Case number assigned (available through the Planning Department), followed by an underscore and the appropriate discipline code. In the instance where there is more than one file, assign an appropriate sequential number to the end (ex. 1,2,3). Special characters are not permitted except for the following; hyphens [-], underscores [_], and/or parenthesis [()].

Example 1.

A set of engineering design plans and documents were prepared for project file number 12-34; acceptable filenames would be as follows:

12-34_Existing Conditions1.dwg
 12-34_Exisitng Conditions2.dwg
 12-34_General1.dwg
 12-34_Generale.dwg

9. **Completed Department Sign-Off Sheet** (1 original copy)

10. **Application Fee** (All fees are due at time of application submission)

Official Use Only:

For the Planning Board, this application has been received by the Planning Division of the Department of Planning, Housing & Community Development on the date specified below:

Review date: _____ All materials submitted: Yes No

Development Impact Statement

Dear Ms. Gonet:

Please accept this Development Impact Statement in support of McDonald's USA LLC.'s (c/o Bohler Engineering) request for Site Plan Approval and Special Permit in association with the "McDonald's" restaurant redevelopment project being proposed at a parcel of land located within McDonald's Leased area within King's Plaza Shopping Center at 1080 Kings Highway ("site"). The subject property is further identified as Map #125, Lot #29 on the City of New Bedford's Tax Assessor's maps. The site, which contains approximately 0.95 acres of land situated within the Planned Business (PB) zoning district. The site is currently developed with an existing McDonald's restaurant and associated paved parking.

The proposed project involves the demolition of the existing ±5,145 square foot McDonald's and construction of 4,450± square foot McDonald's with 40 parking spaces. Based upon the size of the building, the proposed "McDonald's" requires 56 parking spaces be provided in accordance with Section 3130 of the New Bedford Zoning Laws. The Applicant is requesting a Special Permit under Section 3120 of the New Bedford Zoning Laws to allow a reduction in the number of required parking spaces down to the 40 spaces proposed. The standard method for calculating trip generation, according to the Institute of Transportation engineers (ITE) trip Generation Manual, Ninth Edition is based on the number of seats for a restaurant use. It's notable that under existing conditions there are 50 parking stalls and 124 seats, where proposed conditions provide 40 parking spaces and substantially reduces seats to 72. This is a 42% reduction in seats and only a 20% reduction in spaces as compared to existing conditions. Based on current traffic volume to the existing store and the substantial reduction in seats, the applicant is confident that 40 parking spaces will be adequate to accommodate the parking demand for the development.

Traffic circulation proximate to the McDonald's is being improved with the addition of curbing and designated entrance & exit driveways. Additional improvements include side-by-side drive-thru ordering stations, increased landscaping, decreased impervious area ($\pm 4,625$ SF reduction), new utilities, and a drainage system which includes the addition of water quality treatment where none exists currently. Stormwater treatment will be improved by increasing pervious area within the Site and also by adding two (2) stormwater quality units.

EXHIBIT "A"

That certain tract or parcel of land with all buildings and improvements shown as Lot B on a plan dated November 22, 1971, recorded with said Deeds, Plan Book 86, Plan No. 69, thereon situated on the easterly side of King's Highway (State Route 140) in the City of New Bedford, Bristol County, Massachusetts, is herein bounded and described:

Beginning at the most northwesterly corner of the herein described parcel said corner being located S 32 08' 24" W two hundred thirty four and 00/100 (234.00') from the intersection of the easterly highway line of King's Highway with the westerly line of land now or formerly of the Penn Central Railroad;

Thence proceeding S 58 04' 05" E a distance of one hundred twenty five and 00/100 (125.00) feet to a point;

Thence proceeding N 80 52' 14" E a distance of fifty-eight and 00/100 (58.00') feet to a point;

Thence proceeding along the chord of an arc N 08 18' 57" W a distance of one hundred nineteen and 98/100 (119.98') feet to a point, said arc having a radius eleven thousand, three hundred sixty and 19/100 (11,360.19') feet and an arc length of one hundred nineteen and 98/100 (119.98'), the last three courses bounded northerly, and westerly by land now or formerly of the Shell Oil Company;

Thence proceeding N 81 22' 53" E a distance of sixty-six and 00/100 (66.00') feet to a point;

Thence proceeding along the chord of an arc S 08 18' 46" E a distance of one hundred twenty two and 82/100 (122.82') feet to a point, said arc having a radius of eleven thousand four hundred twenty six and 19/100 (11,426.19') feet and an arch length of one hundred twenty two and 82/100 (122.82');

Thence proceeding S 08 00' 10" E a distance of one thousand four hundred twenty and 00/100 (1,420.00') feet to a point, the last three courses bounded northerly and easterly by land now or formerly of the Penn Central Railroad;

Thence proceeding S 81 59' 50" W a distance of four hundred twelve and 00/100 (412.00') feet to a point;

Thence proceeding N 08 00' 10" W a distance of four hundred eleven and 29/100 (411.29') feet to a point;

Thence proceeding N 58 32' 07" W a distance of thirty seven and 59/100 (37.59') feet to a point;

Thence proceeding N 10 08' 29" W a distance of three hundred sixty and 00/100 (360.00') feet to a point;

Thence proceeding N 57 56' 23" W a distance of two hundred seventy-six and 00/100 (276.00') to a point on the easterly side of King's Highway so called, the last five courses bounded southerly, westerly, southerly, westerly and southerly by land now or formerly of First Bristol Corporation, Trustee of Fieldstone Realty Trust;

Thence proceeding N 32 08' 24" E along the easterly highway line of king's highway so-called a distance of thirty seven and 72/100 (37.72') feet to a Massachusetts Highway bound found;

Thence continuing N 32 08' 24" E along the said highway line a distance of five hundred seventy six and 18/100 (576.18') feet to a Massachusetts Highway bound found, thirty three and 00/100 (33.00') feet right of station +75.009;

Thence continuing N 32 08' 24" E along said highway line a distance of seventy seven and 66/100 (77.66') feet to the point and place of beginning;

Said parcel contains 15.348 acres more or less.

Together with and the benefit of Grant of Driveway and Access Easement and of Restriction between Shell Oil Company and King's Plaza Associates Limited Partnership dated June 6, 1995 and recorded in Book 3486, Page 228.

APPENDICES

- A. USGS & FEMA MAPS
- B. PRE & POST RUNOFF CALCULATIONS & TSS REMOVAL CALCULATIONS
- C. LONG TERM STORMWATER SYSTEM OPERATION AND MAINTENANCE PLAN
- D. LONG TERM POLLUTION PREVENTION PLAN
- E. ANRAD APPLICATION SE49-664 PLAN

I. PROJECT SUMMARY

The proposed project involves the demolition of the existing approximately 5,145 square foot McDonald's and construction of a 4,450± square foot McDonald's. Additional proposed improvements include the addition of side-by-side ordering stations, increased landscaping, decreased impervious area ($\pm 4,625$ SF reduction), new utilities, and a drainage system which includes the addition of water quality treatment where none exists currently.

A comparison of the peak existing and proposed conditions runoff rates for the 2, 10, 25 & 100 year storms using the Rational Formula demonstrates that the decrease in impervious area will result in a decrease in peak runoff rates (please refer to calculations in Appendix B):

Existing Flows:

Q_2 : 2.95 cfs

Q_{10} : 4.17 cfs

Q_{25} : 4.86 cfs

Q_{100} : 6.08 cfs

Proposed Flows:

Q_2 : 2.73 cfs; decrease = 0.22 cfs

Q_{10} : 3.86 cfs; decrease = 0.31 cfs

Q_{25} : 4.50 cfs; decrease = 0.36 cfs

Q_{100} : 5.62 cfs; decrease = 0.46 cfs

II. EXISTING SITE CONDITIONS

The proposed project site is the existing McDonald's Restaurant located in the northerly part of King's Plaza at 1080 Kings Highway in New Bedford. The parcel is approximately 3.9 acres in area and is further defined as assessor's map 125, lot 29. The Site currently drains via sheet flow over the parking lot from West to East, which eventually flows to a wetland. The wetland is located outside of the Site, between the Site property line and the railroad tracks to the Southeast. Portions of the proposed project fall within 100-feet of the off-site wetlands. The wetland delineation was approved under ANRAD Application SE49-664, which is still valid. For reference, Appendix E provides a copy of the ANRAD plan.

III. PROPOSED SITE CONDITIONS

The proposed project involves the demolition of the existing approximately 5,145 square foot McDonald's and construction of a 4,450± square foot McDonald's. Additional proposed improvements include the addition of side-by-side ordering stations, increased landscaping, decreased impervious area ($\pm 4,625$ SF reduction), new utilities, and a drainage system which includes the addition of water quality treatment where none exists currently. Stormwater treatment will be improved by increasing pervious area within the Site and also by adding two (2) stormwater quality units. Indirect impacts from stormwater discharges are to be mitigated through the use of sedimentation and erosion control measures during construction and implementation of stormwater Best Management Practices that comply with DEP standards. The stormwater management system will meet all applicable requirements of the current Massachusetts Department of Environmental Protection Stormwater Policy Handbook guidelines as further detailed below.

IV. MASSACHUSETTS DEP STORMWATER MANAGEMENT STANDARDS

The following section describes the project's conformance with the Massachusetts DEP's current Stormwater Management Standards.

Low Impact Development (LID) Measures

The amount of impervious area under proposed conditions will be roughly 4,625 SF less than existing conditions. In addition to the increased pervious area, a grassed swale is proposed to further promote infiltration and stormwater treatment.

Standard #1 **No new stormwater conveyances (e.g. outfalls) may discharge untreated stormwater directly to or cause erosion in wetlands or waters of the Commonwealth.**

The project will not result in any new direct discharge of untreated stormwater into, or cause erosion of wetlands or waters of the Commonwealth.

Standard #2: **Stormwater management systems shall be designed so that post-development peak discharge rates do not exceed pre-development peak discharge rates.**

Runoff rates for the post-development conditions were calculated for the 2-year, 10-year, 25-year and 100-year 24-hour storm events. These are provided in the stormwater pre and post development peak rate calculations in Appendix B. As summarized in this report, post-development peak discharge rates will be less than existing rates.

Standard #3: Loss of annual recharge to ground water shall be eliminated or minimized through the use of infiltration measures including environmentally sensitive site design, low impact development techniques, stormwater best management practices, and good operation and maintenance.

The amount of impervious area under proposed conditions will be roughly 4,625 SF less than existing conditions. In addition to the increased pervious area, a grassed swale is proposed to further promote infiltration and stormwater treatment.

Standard #4: Stormwater management systems shall be designed to remove 80% of the average annual post-construction load of Total Suspended Solids (TSS)

The proposed Best Management Practices for this site provides for 25.6% TSS removal. This is a substantial increase from the 0% removal efficiency the site currently receives. It's also notable that the 25.6% TSS removal rate does not take credit for potential TSS removal from the grassed swale. We believe we are meeting the requirement for TSS removal to the maximum extent practicable based on existing site constraints.

Standard #5: For land uses with higher potential pollutant loads, source control and pollution prevention shall be implemented in accordance with the Massachusetts Stormwater Handbook to eliminate or reduce the discharge of stormwater runoff from such land uses to the maximum extent practicable.

The proposed project is considered a land use with "Higher Potential Pollutant Loads (LUHPPL)," and as such has been designed in accordance with the Massachusetts Stormwater Management regulations. Stormwater BMPs include stormwater quality units and grass swale. A long-term pollution prevention plan has been developed for this project (see Appendix D).

Standard #6: Stormwater discharges within the Zone II or Interim Wellhead Protection Area of a public water supply, and stormwater discharges near or to any other critical area, require the use of the specific source control and pollution prevention measures and the specific structural stormwater best management practices determined by the Department to be suitable for managing discharges to such areas, as provided in the Massachusetts Stormwater Handbook.

The site does not contain, nor directly discharge to any critical areas, as defined by the Department of Environmental Protection.

Standard #7: A redevelopment project is required to meet the following Stormwater Management Standards only to the maximum extent practicable

The project is a redevelopment project and meets the Stormwater Management Standards to the maximum extent practicable.

Standard #8: A plan to control construction-related impacts including erosion, sedimentation and other pollutant sources during construction and land disturbance activities (construction period erosion, sedimentation, and pollution prevention plan) shall be developed and implemented.

An erosion and sediment control plan has been developed for this project implementing at a minimum: silt fence, a crushed stone construction exit, inlet protection, and provisions for stabilizing disturbed areas. Registration of the site under the NPDES Construction General Permit will be done prior to construction, as necessary.

Standard #9: A long-term operation and maintenance plan shall be developed and implemented to ensure that stormwater management systems function as designed.

An Operation and Maintenance Plan developed in accordance with the Stormwater Management Standards is provided in Appendix C of this report.

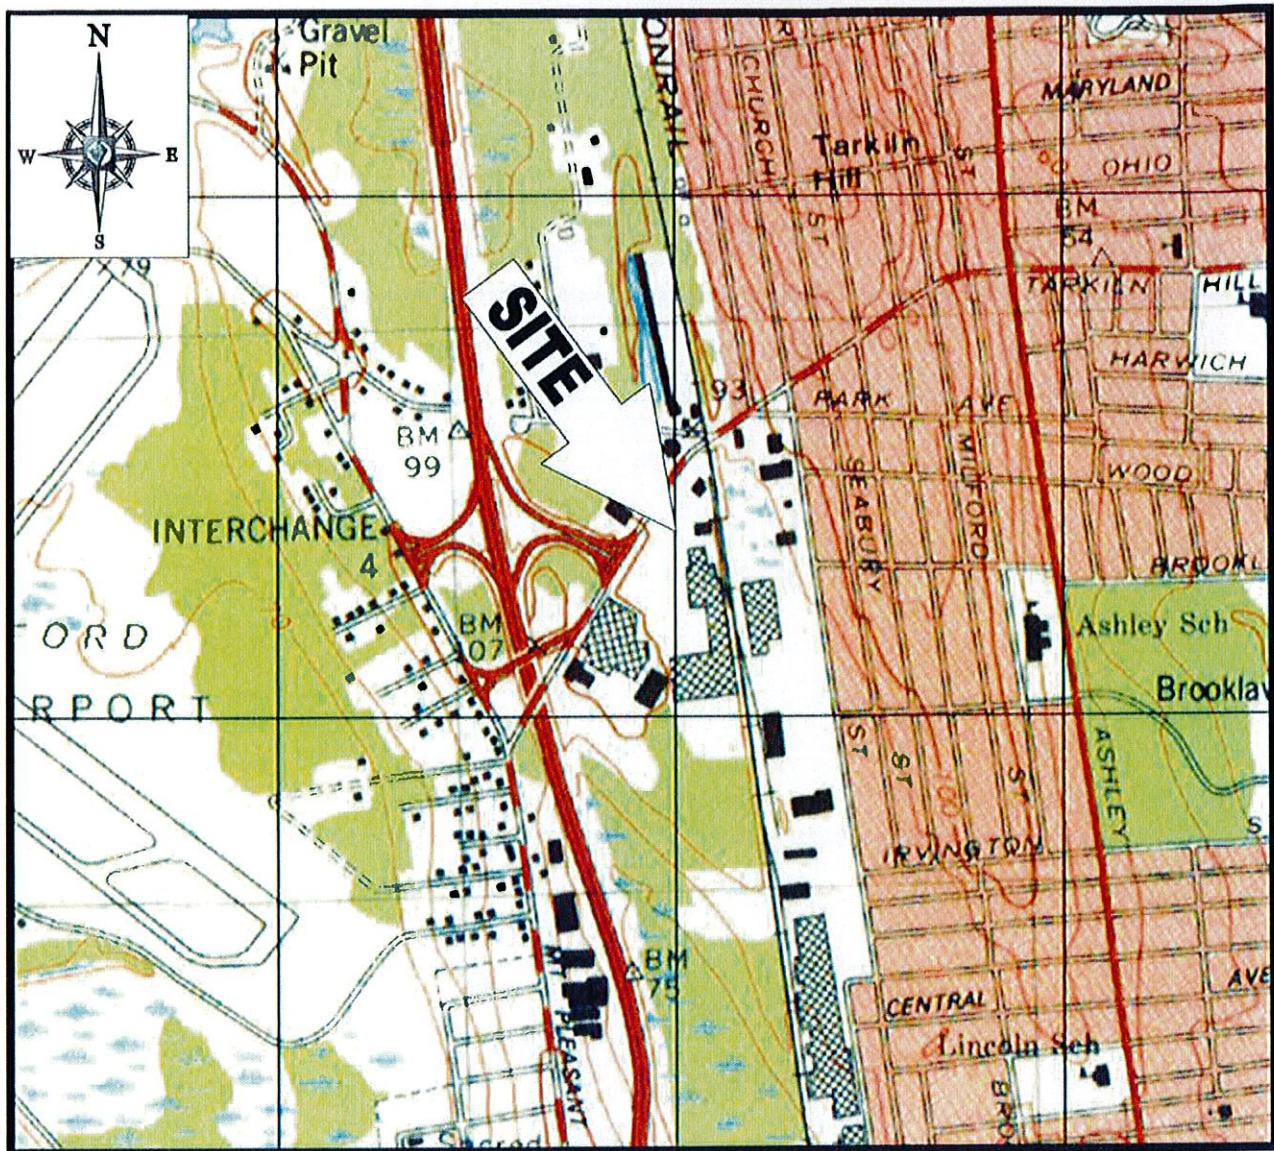

Standard #10: All illicit discharges to the stormwater management system are prohibited.

The proposed stormwater system will convey only stormwater and allowable non-storm discharges (firefighting water, landscape irrigation, air conditioning condensate, etc.) and will not contain any illicit discharges from prohibited sources.

V. SUMMARY

The existing Site currently sheet flows over the parking lot to an area which eventually flows to a wetland. In an effort to substantially increase stormwater treatment, the proposed design captures a portion of the surface flow and will treat the stormwater via a stormwater quality unit prior to discharging to a grassed swale. The total peak runoff rates for the post-development rates will be less than the pre-development rates. Water quality BMPs at the site will be in accordance with Massachusetts DEP Stormwater Management requirements, and will incorporate the use of stormwater quality inlet units as possible. The proposed Best Management Practices for this site provides for 25.6% TSS removal, which is a substantial improvement over the existing 0% removal efficiency the site currently receives. It's also notable that the 25.6% TSS removal rate does not take credit for potential TSS removal from the grassed swale. The project meets or exceeds the applicable stormwater management requirements, and therefore, it is anticipated that this project will have no adverse impacts on the surrounding environment.

Pre and Post Development Rational Formula Calculations

$$\text{Pre-Development "c"} = \frac{6,244 \times 0.3 + 39,745 \times 0.9}{45,989} = 0.819$$

$$\text{Post-Development "c"} = \frac{10,867 \times 0.3 + 35,122 \times 0.9}{45,989} = 0.758$$

$$Q = ciA \quad \text{Where } A = 1.06 \text{ Ac}, c = 0.819 \text{ or } 0.758$$

	Pre	Post
$i_2 = 3.4 \text{ in/hr}$	$Q_2 = 2.95 \text{ cfs}$	2.73 cfs
$i_{10} = 4.8 \text{ in/hr}$	$Q_{10} = 4.17 \text{ cfs}$	3.86 cfs
$i_{25} = 5.6 \text{ in/hr}$	$Q_{25} = 4.86 \text{ cfs}$	4.50 cfs
$i_{100} = 7.0 \text{ in/hr}$	$Q_{100} = 6.08 \text{ cfs}$	5.62 cfs

Water Quality Flow

SWQU 1:

$$Q = (qu)(A)(WQV) \quad A = 7,430 \text{ SF} \times \frac{1 \text{ Ac}}{43,560 \text{ SF}} \times \frac{1 \text{ mi}^2}{640 \text{ Ac}} = 0.000267 \text{ Ac}$$

$$WQV = 1"$$

$$Q = 773 \times 0.000267 \times 1.0 \quad qu = 773$$

$$Q = 0.206 \text{ cfs}$$

SWQU 2:

$$Q = (qu)(A)(WQV) \quad A = 6,746 \text{ SF} \times \frac{1 \text{ Ac}}{43,560 \text{ SF}} \times \frac{1 \text{ mi}^2}{640 \text{ Ac}} = 0.000242 \text{ Ac}$$

$$WQV = 1"$$

$$Q = 773 \times 0.000242 \times 1.0 \quad qu = 773$$

$$Q = 0.187 \text{ cfs}$$

TSS Removal:

CB-1 & CB-2 to SWQU-1:

A= 7,430 SF; 81% TSS removal

SWQU-2:

A=6,746 SF; 75% TSS removal

Sheet flow from parking to grass swale:

A= 27,313 SF; 0% TSS removal

Weighted Average:

$$[(7,430 * 0.81) + (6,746 * 0.75) + (27,313 * 0)] / 41,489 = 0.256$$

Weighted average TSS removal = 25.6%

**LONG TERM STORMWATER SYSTEM
OPERATION AND MAINTENANCE PLAN**

LONG TERM STORMWATER SYSTEM OPERATION AND MAINTENANCE PLAN

Owner: Cedar-Kings LLC
44 South Bayles Avenue
Port Washington, NY 11050

General Contractor: TBD

Lessee: McDonald's USA, LLC
690 Canton Street
Westwood, MA 02090

The General Contractor shall have all logs and reports as stated within the Stormwater Pollution Prevention Plan readily available at all times for inspection by City's agents.

Method of recording for future Owners

- Deed
- Order of Conditions
- Other: Approved Site Plans

DRAINAGE SYSTEM

COMPONENT: Stormwater Quality Unit

RESPONSIBILITY:

During Construction: General Contractor
Post Construction: Owner

ACTION: Inspection / cleaning

FREQUENCY: Per Manufacturer's Maintenance Guidelines or once per six months whichever is more restrictive.

DESCRIPTION: See Manufacturer's Maintenance Guidelines. All accumulated materials shall be disposed of in accordance with DEP regulations.

BUDGET: Inspection/cleaning- \$1,000/ yr per unit

COMPONENT: Grassed Drainage Swale

RESPONSIBILITY:

During Construction: General Contractor
Post Construction: Owner

ACTION: Mowing

FREQUENCY: bi-weekly.

DESCRIPTION: Remove trash and debris prior to mowing.

BUDGET: Trash Removal & mowing \$1,000/ yr.

CONSTRUCTION ACTIVITY FORM

NOTE: The contractor is responsible for maintaining an accurate and complete log of construction activities, including, but not limited to, commencement of stabilization, major grading activities, timeframes when construction ceases on a portion of site (temporary or permanent) until the Notice of Termination (NOT) is filed.

MAJOR STABILIZATION AND GRADING ACTIVITIES

POST CONSTRUCTION ACTIVITY FORM

NOTE: The contractor is responsible for maintaining an accurate and complete log of construction activities, including, but not limited to, commencement of stabilization, major grading activities, timeframes when construction ceases on a portion of site (temporary or permanent) until the Notice of Termination (NOT) is filed.

MAJOR STABILIZATION AND GRADING ACTIVITIES

Long-Term Pollution Prevention Plan

Proposed Restaurant

1080 Kings Highway

New Bedford, Massachusetts

1. Good Housekeeping Practices

The Owner/Operator shall use good housekeeping practices by following the Operation and Maintenance plans as provided within this report.

2. Provisions for storing materials and waste products inside or under cover

Hazardous materials or wastes are not expected to be stored at the site. Any such materials or wastes will be stored and handled in accordance with all applicable local, state, and federal regulations. In the event of a significant spill of any hazardous material or waste, emergency contact numbers are listed below.

3. Vehicle washing controls

Vehicle washing is not anticipated to occur at this site.

4. Requirements for routine inspections and maintenance of stormwater BMPs

The Owner/Operator shall maintain the BMP's by following the Operation and Maintenance Plan.

5. Spill prevention and response plan

There is very limited risk of significant spills at this site. Any spill requiring action would most likely be associated with motor vehicles. In the event of a large spill contact the following:

Mass DEP 24 hour Spill Emergency Response Notification line: 888-304-1133.

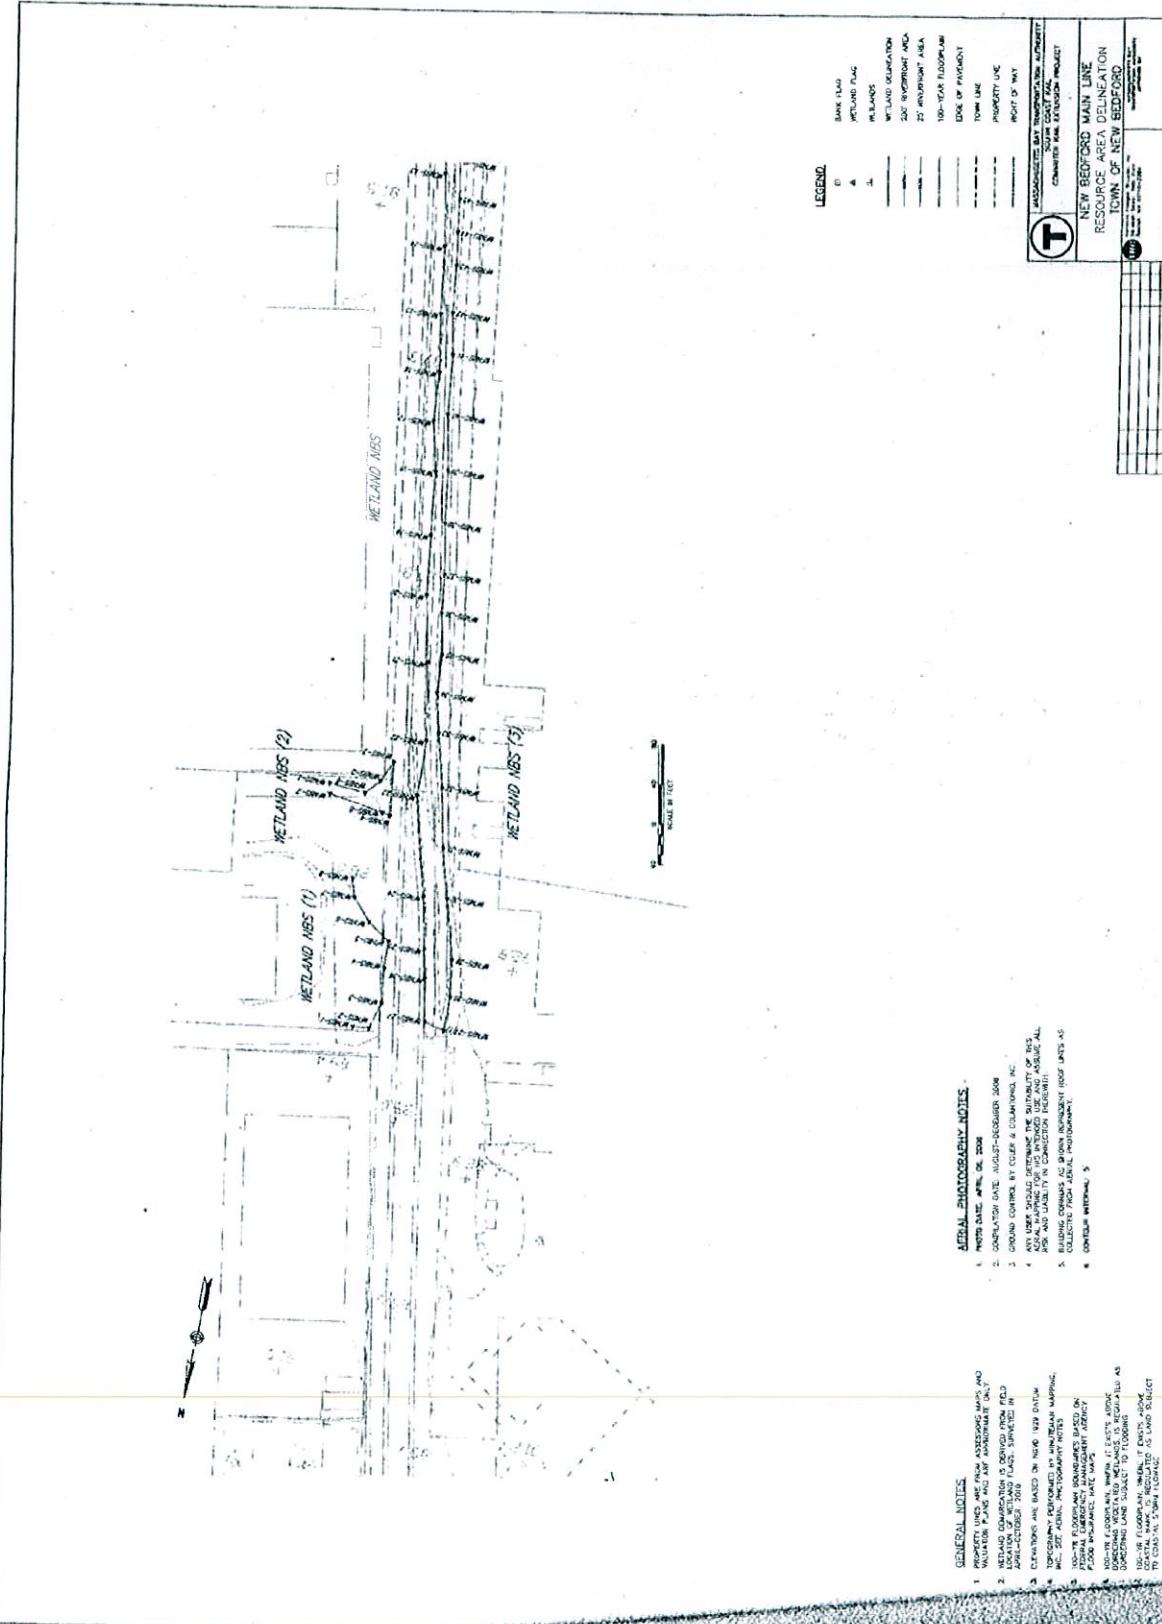

Regulatory Contacts

Contact information for reporting oil and hazardous materials releases to the EPA, DEP, and local agencies are provided below.

MEMORANDUM

TO: City of New Bedford Planning Board

FROM: Ronald H. Labelle, Commissioner, D.P.I

DATE: September 2, 2015

RE: Site Plan- McDonald's
Kings Highway
Plot 125 Lot 29

The Department of Public Infrastructure has reviewed the proposed site plan referenced above and recommends approval with the following conditions:

1. All utilities to be installed in accordance with City of New Bedford Standards.
2. Permits for drainage, sewer and water must be obtained from the Department of Public Infrastructure Engineering Division
3. Drainage design must comply with Phase II, Mass. Department stormwater management standards. All run off water from site must be treated before entering the existing swale.
4. Owner/ Developer must contact the Department of Public Infrastructure Engineering Division to assign a new address for the proposed building.
5. Owner/ Developer to verify the condition of the existing 6" sewer main on private property.
6. The Department of Public Infrastructure requires a final set of approval plans to be submitted that reflects all revisions made prior to the start of construction.
7. Developer and site contractor must schedule a pre-construction meeting with the Department of Public Infrastructure prior to the start of construction.
8. Upon completion Engineer must Submit "As Built Drawings" in CADD format prior to the certificate of occupancy being issued.

VIPER - LARGE (LED)

Large Viper Luminaires

Max Weight: 25.0 lbs

Max EPA: 1 sq ft

General: The Beacon Viper luminaire is available in two sizes with a wide choice of different LED Wattage configurations and optical distributions designed to replace HID lighting up to 1000W MH or HPS and with 5 different mounting options for application in a wide variety of new and existing installations. Luminaires are suitable for wet locations.

Bezel Optic System: Each Viper luminaire is supplied with an one piece optical cartridge system consisting of an LED engine, LED lamps, optics, gasket and stainless steel bezel. The cartridge is held together with internal brass standoffs soldered to the board so that it can be field replaced as a one piece optical system. Two-piece silicone and micro-cellular polyurethane foam gasket ensures a weather-proof seal around each individual LED.

The optical cartridge is secured to the die cast housing with fasteners. The optics are held in place without the use of adhesives. The cartridge assembly is available in various lighting distributions using TIR designed acrylic optical lenses over each LED.

Lifesheild™ Circuit: Thermal circuit shall protect the luminaire from excessive temperature by interfacing with the 0-10V dimmable drivers to reduce drive current as necessary. The factory-preset temperature limits shall be designed to ensure maximum hours of operation to assure L70 rated lumen maintenance. The device shall activate at a specific, factory-preset temperature, and progressively reduce power over a finite temperature range.

A luminaire equipped with the device may be reliably operated in any ambient temperature up to 55°C (131°F). The thermal circuit will allow higher maximum Wattages than would be permissible on an unregulated luminaire (if some variation in light output is permissible), without risk of premature LED failure or lumen depreciation. Operation shall be smooth and undetectable to the eye. Thermal circuit shall directly measure the temperature at the LED solder point. Thermal circuit shall consist of surface mounted components mounted on the LED engine (printed circuit board). For maximum simplicity and reliability, the device shall have no dedicated enclosure, circuit board, wiring harness, gaskets, or hardware. Device shall have no moving parts, and shall operate entirely at low voltage. The device shall be located in an area of the luminaire that is protected from the elements. Thermal circuit shall be designed to "fail on", allowing the luminaire to revert to full power in the event of an interruption of its power supply, or faulty wiring connection to the drivers.

Device shall be able to co-exist with other 0-10V control devices (occupancy sensors, external dimmers, etc.). The device will effectively control the solder point temperature as needed; otherwise it will allow the other control device(s) to function unimpeded.

Printed Circuit Board (PCB): Aluminum thermal clad board with 0.062" thick aluminum base layer, thermally conductive dielectric layer, 0.0014" thick copper circuit layer circuit layer designed with copper pours to minimize thermal impedance across dielectric. Board will be mounted to the heat sink using minimum 12 #4-40 screws to ensure contact with thermal pad and heat sink. Use of thermal grease will not be allowed.

Housing and LED Thermal Management: The Viper' monolithic housing design creates over 4.5 square feet (small Viper) or 7.7 square feet (large Viper) of heat-sinking surface area. Vertical fins, combined with flow-thru openings prevent sediment and moisture buildup on critical heat sinking surfaces without the need for grates, screens or other debris control tactics. The Viper housing, electrical compartment and filter are made from die cast aluminum that is pre-treated and powder-coated to meet the most rugged industry standards. The finish is corrosion resistant to meet ASTMB-117, resists cracking or loss of adhesion per ASTM D522, resists surface impacts of up to 160 inch-pound. All external hardware is corrosion resistant. The housing serves as a heat-sink for the LED bezel with a separate compartment for the drivers.

Electrical Assembly: The fixture electrical compartment shall contain all LED driver components and shall be provided with a push-button terminal block for AC power connections. The housing is designed for an optional twist lock photo control receptacle.

Accessibility: Although the Viper luminaire is designed to operate for many years without maintenance, accessibility is a key component in its design. The Drivers are mounted on a removable door that is secured with keyslotted screws and hinges down for convenient access. The drivers are field replaceable using quick disconnects.

Drivers: Luminaires are equipped with an LED driver that accepts 100V through 277V, 50 Hz to 60 Hz (UNIV), or a driver that accepts 347V or 480V input. Power factor is .92 at full load. All electrical components are rated at 50,000 hours at full load and 25°C ambient conditions per MIL- 217F Notice 2. Dimming drivers are standard, with connections for external dimming equipment available upon request. Component-to-component wiring within the luminaire may carry no more than 80% of rated load and is listed by UL for use at 600VAC at 50°C or higher. Plug disconnects are listed by UL for use at 600 VAC, 13A or higher. 13A rating applies to primary (AC) side only.

Surge Protector: The on-board surge protector shall be a UL recognized component for the United States and Canada and have a surge current rating of 20,000 Amps using the industry standard 8/20 pSec wave. The LSP shall have a clamping voltage of 825V and surge rating of 540J. The case shall be a high-temperature, flame resistant plastic enclosure.

Fasteners: All fasteners shall be stainless steel. When tamper resistant fasteners are required, spanner HD (snake eye) style shall be provided (special tool required, consult factory).

Color Rendering Index (CRI): Luminaire shall have a minimum CRI of 67 at 5000K.

Operating Environment: Shall be able to operate normally in ambient temperatures from -40°C to 40°C

Finish: Finish shall be a Beacote V polyester powder-coat electro-statically applied and thermocured. Beacote V finish shall consist of a five stage iron phosphate chemical pretreatment regimen with a polymer primer sealer, oven dry off, and top coated with a thermoset super TGIC polyester powder coat finish. The finish shall meet the AAMA 605.2 performance specification which includes passing a 3000 hour salt spray test for corrosion resistance and resists cracking or loss of adhesion per ASTM D522 and resists surface impacts of up to 160 inch-pound.

Agency Certification: The luminaire shall bear a CSA label and be marked suitable for wet locations. The Beacon Viper is approved by the International Dark-Sky association as a dark sky friendly fixture.

Warranty: Beacon luminaires feature a 5 year limited warranty. Beacon LED luminaires with LED arrays feature a 5 year limited warranty covering the LED arrays. LED drivers are covered by a 5 year limited warranty. PIR sensors carry a 5 year limited warranty from the sensor manufacturer. See Warranty Information on www.beaconproducts.com complete details and exclusions.
